

ABOUT THE DEPARTMENT

The PG Department of Information Technology (M.Sc. IT) was established in 2001 to provide a conducive environment for learning computer technology and career-oriented subjects, keeping in view the changing trends in education and the IT industry. In 2009, the college attained autonomous status, which enabled the department to introduce specialization subjects and innovative courses to meet the current requirements of the industry.

The department has consistently recorded a very high pass percentage and placement success rate. We are also proud of our alumni, many of whom are well placed in reputed organizations and hold key positions. Institutional training is also a part of the academic curriculum, through which students undergo training every year to gain exposure to the IT industry. The department regularly updates the syllabus under the Learning Outcome Based Curriculum Framework (LOCF). Each year, students actively participate in various cultural and extracurricular activities, win numerous prizes, and bring laurels to both the department and the college.

PG

PROGRAMME OFFERED

MASTER OF INFORMATION
TECHNOLOGY (M.SC IT)

VALUE ADDED COURSES

- 01 Data Analytics
- 02 Advanced Ethical Hacking
- 03 Amazon Web Service
- 04 Web Designing
- 05 Robotics

INFOCA FORUM

- INFOCA integrates all departmental activities through seminars, training programmes, skill-development initiatives, and an investiture ceremony to appoint student badge holders.
- Its objective is to share knowledge on recent advances in computer applications and promote overall student development.

CYBERFEST

- An intercollegiate technical event is organised by the department every year since 2015.
- It helps students across the state to improve their technical skills, team work and also for their career

INVESTITURE CEREMONY

- The Investiture Ceremony is conducted to formally appoint badge holders and student representatives.
- It instills leadership qualities, responsibility, and a sense of commitment among students.

VISION

Imparting quality education, equipping students with latest tools in Information Technology to lead the industry and society

MISSION

- To provide the ambience for learning.
- To provide the team-spirit and leadership qualities.
- Strengthen the competence level in information technology through analytical learning.
- Enhance the entrepreneurship skills through Internship and Industrial Visit.
- To upgrade the knowledge in Information technology through latest technologies
- To equip them with technical and soft skills and make them employable

BEST PRACTICES

- Conduct group discussions with thought-provoking questions.
- Provide opportunities for students to learn new software tools.
- Organizes industrial visits to understand the organizational structure, working environment and help them to be industry ready.
- Encourage effective utilization of library resources.
- Implement ICT-based teaching, learning, and evaluation methods.
- Conduct remedial classes to improve academic performance and pass percentage.
- Uniform dress code from the academic year 2026–2027 onwards. Students must wear uniform on Monday and Friday.

DEPARTMENT ACTIVITIES

INFOTHON

- An Infathon (Ideathon) is being conducted every year for students from other colleges to encourage innovative ideas and problem-solving skills.
- The event provides a platform for intercollegiate interaction, creativity, and technical excellence.

INTERNATIONAL CONFERENCE

- An international conference titled Blockchain & Artificial Intelligence is being organized by the department, featuring eminent chief guests from reputed overseas institutions and universities.
- The conference is conducted annually and aims to provide global exposure and insights into diverse AI applications across various industries.

OTHER ACADEMIC ENRICHMENT ACTIVITIES

- The department organizes seminars, workshops, training programmes, and industrial visits every semester.
- These activities enhance practical knowledge, industry exposure, and overall skill development of students. The conference aims to provide global exposure and insights into diverse AI applications across industries.
